

In Maths this week we have learnt all about the number 10 and how many ways we can make ten using Numicon, dice, counters, ladybird spots and whole and part numbers.

If you want to play a game with the children at home, give them a number between 0 and 9 and ask them how many more they will need to get to 10. They will use their fingers to work this out.

You can also keep practicing what the numeral 0-10 looks like. If they already know this then you can ask numbers to 20.

We have been celebrating birthdays this week. We found out about different traditions in different countries, and the history of birthdays and why we celebrate them. We have been writing birthday invitations, birthday cards, party food shopping lists and making party hats.

The children enjoyed playing pin the tail on the donkey. They also played a game of party bingo.

A letter has come out about the Nativity. The children in Wrens will all be 'Stars'. We are learning a song and some actions and a few children will do a little dance. They are looking forward to being on the stage and performing to you all.

We would really appreciate your support over the weekend to teach your child how to put their own gloves on. As you can imagine it is very difficult for us to put gloves onto all of the children and it takes time out of their lunch time play. Mittens are better if your child cannot put gloves on yet. Thank you.
