

Wren's News

WB 8th January

This week we have been learning all about how to keep our teeth clean and healthy. We have been learning there is four important ways to do this, brush our teeth, visit the dentist, eat foods that make our teeth strong, drink milk and water and make sure we don't eat and drink too much sugar. The children have enjoyed sharing their experiences of going to the dentist too.

This week in phonics we have been learning the new sounds: ar, ur, oo (moon) and or.

We have been learning the tricky words: they, all and are.

In maths this week we have been practicing quick recall of an amount, using a dice. We have started looking at number bonds to 10 (different ways of making 10). We have also been matching numerals to numicon.
