

This week we have been learning all about Drs, nurses and paramedics. We have been talking about hospitals and the Drs Surgery. We have been thinking about how to try and stop germs and infection spreading, especially thinking about why washing our hands properly is so important. The children have been exploring our hospital role play, creating their own ambulances, cutting out items to go in their Drs bag. Painting an X-RAY of their hands and conducting an experiment using water pepper and soap to see how soap can not only get rid of germs but act as a barrier too.

This week in phonics we have been learning the new sounds: ow (growl) oi (coin) ear (year) air (hair).

We have been reviewing the tricky words we have already learnt.

In maths this week we have been using a rekenrek (like an abacus) to help us explore number bonds to 10. We have also been exploring ways of manipulating shapes to create new shapes and looking for smaller shapes inside larger shapes.

Next week we are learning about vets and pets and we are going to have a go at making 'fish tanks' could you please send your child with a named box. (Shoe box or cereal box size) Thank you!

Wednesday 24th -Parent drop in.

Once you have collected your child you can go to the main gate and then once they are open you can come a look at your child's book.
