

Wren's New

WB 13th May 2024 Term 5

We have been doing some lovely research about different places of worship in Religious Education this week. The Wrens were inspired to build churches and other religious buildings, they took care and were very thoughtful.

We have also been learning a little about space, meteoroids, shooting stars and the Moon.

The children joined in with the whole school write and they planned their own stories by drawing their story board and then having a go at a beginning, a middle and an end of their story. They are becoming very independent at using the prompts that are in place for them.

We have all enjoyed learning about The Little Red Hen, especially making our bread. We made our cook books and these will come home with your child at the end of this week.

In maths we have been continuing to subitise, looking at dot patterns for numbers and using our Tens frame.

We are also using our 10 fingers and numicon to represent teen numbers, whilst thinking about other number bonds if we did not start with 10. This is quite tricky and some children need support with this.

Keeping with the space theme children also used 2D shapes to draw a spaceship whilst discussing the properties of the shape.

Ask your children what they know about doubling at home and see if they can show off! Use objects in the house to support them if required.

Thank you so much to all of you that managed to attend the 'Come and Play' session, we appreciate that it is not always easy to commit to these things. It went so well and it is clear to see how much all of you support your children's learning. They are very lucky children.

Swimming was amazing again on Thursday afternoon and the children are enjoying the session so much.

All of the children are working so hard in school and are making such huge amounts of individual progress. You should all be so proud of them.
